

## **DOMESTIC MANAGED BANDWIDTH**

### **SERVICE DESCRIPTION**

#### **Domestic Managed Bandwidth Service**

Our Domestic Managed Bandwidth Service is offered at variable speed classes and consists of furnishing for the private use of Customers and Authorized Users, the requisite channel facilities for direct transmission and reception of voice, data, facsimile, video and other lawful communications services. Managed Bandwidth Service is offered by NTT America using Leased Lines at a speed no greater than the bandwidth selected by the Customer on a constant basis to or from an Access Point or network terminating point designated by a Customer.

The following option is also available for the Managed Bandwidth Service:

*Emergency Back-up Option* (Leased Line service permitting, by Customer's prior application that is accepted by NTT America in writing, switchovers to back-up routes during times of emergency).
