

## **INTERNATIONAL PRIVATE LEASED CIRCUIT (IPLC)**

### **SERVICE DESCRIPTION**

#### **International Private Leased Circuit Service**

NTT America's International Private Leased Circuit Services consist of furnishing for the private use of Customers and Authorized Users services for direct transmission and reception of voice, data, facsimile, video and other lawful communications between an NTT America-designated POP in the United States and the theoretical midpoint of the communications path. End-to-end International Private Leased Circuit Services may be provided in conjunction with the facilities and services of other carriers and Correspondent Carriers designated by the Customer. The International Private Leased Circuit Services are offered by NTT America at a fixed bandwidth selected by the Customer.
